Mandatory Publication Form

The corresponding author, or the first author, must declare in this form the following information regarding:

- Copyright Confirmation
- Potential Conflict of Interest
- Ethics Committee
- Use of Artificial Intelligence
- Compliance with Open Science
- Authors' Contributions

This form must be submitted through the system at the time of article submission.

Author and Article Information:

Article Title:

Name of the author responsible for signing:

COPYRIGHTS

The undersigned author declares that the article is original, does not infringe copyrights or any other property rights of third parties, and has not been submitted for publication in any other journal.

All manuscripts published by the journal are the permanent property of the authors, with the journal retaining the right of first publication and the right to display, store, copy, and reuse the content.

If there is no response or final approval from the author(s) within 5 (five) days, the editors are authorized to publish the manuscript without requiring subsequent approval for errata(s).

POTENTIAL CONFLICT OF INTEREST

Potential conflicts of interest are defined as relationships between an author, either directly or indirectly, through the institution sponsoring the research, with companies that may potentially benefit from the study's results. The following types of relationships are considered potentially conflicting and must be declared

If, within the last two years, any of the authors:

- 1) Received consulting fees, honoraria for lectures, writing fees, or any other forms of paid services from the product manufacturer.
- 2) Received support from the product manufacturer (research grants, provision of equipment, drugs, or personnel) related to the project in question or another project involving the same product.
- 3) Received support from the product manufacturer for attending conferences.
- 4) Owned shares in the product manufacturer.
- 5) Had the product manufacturer involved in the collection, analysis, interpretation, or writing of the data.
- 6) Was employed by a company that could benefit directly or indirectly from the study's results.

Declaration:

Academic Affiliation:

This article is part of the thesis of _____
(master's, doctorate, habilitation) by _____

(Name(s) of
the author(s)) at _____

(Name(s) of
academic institution(s)).

This study is not affiliated with any postgraduate programs.

Sources of Research Funding:

Indicate the funding sources for the research, such as research funding agencies, non-profit organizations, personal investment, or private sponsorship.

This study was funded by _____

This study was partially funded by _____

This study received no external funding.

Se houve envolvimento de patrocinador externo, o mesmo participou no (a):

Study design: yes no

Data collection: yes no

Data analysis: yes no

Data interpretation: yes no

Did the main author have access to all the study data and take responsibility for the decision to submit the article?

yes no

Potential Conflicts of Interest Among Co-Authors:

Mark one of the options below:

All authors have no conflict of interest

There are co-authors with potential conflicts*

*If applicable, declare below the name(s) of the co-author(s) and the potential conflict(s):

ETHICS COMMITTEE DECLARATION

Declaration of Human and Animal Rights

All studies involving humans and animals were approved by an appropriate ethics committee and were conducted following the ethical standards outlined in the 1975 Declaration of Helsinki and its later amendments.

N/A.

If applicable, provide:

Name of the Ethics Committee: _____

Approval Number: _____

Date: _____

Declaration of Informed Consent

All participants provided informed consent before inclusion in the study.

N/A.

If applicable, provide:

Name of the Ethics Committee: _____

Approval Number: _____

Date: _____

Note: During submission, in addition to this form, authors should also attach the Ethics Committee approval whenever possible.

USE OF ARTIFICIAL INTELLIGENCE

Authors must declare the use of generative AI in scientific writing at the time of article submission.

Permissions for Using Artificial Intelligence:

Generative AI may be used to enhance the readability and clarity of the manuscript but must be supervised by humans and cannot replace the intellectual work of the authors.

Examples:

- AI tools are useful for translating texts into different languages and correcting grammar, punctuation, and style errors, especially for non-native speakers.
- They can transcribe interviews or spoken content.
- AI tools assist in correcting and refining programming commands.
- AI can serve as efficient search tools to gather relevant information and references.
- They can also help create or modify images and figures in submitted manuscripts, provided their use is disclosed.

Restrictions on Using Artificial Intelligence:

- AI tools must not be credited as authors in academic articles. All AI-generated content must be attributed to a responsible human author.
- It is not permitted to use AI to generate substantial parts of the study, such as developing arguments, analyzing data, or interpreting results.
- Data analysis or result interpretation must be carried out by researchers and not by AI.

Was generative AI used in the scientific writing of this manuscript?

Yes

No

If yes, specify:

During the preparation of this work, the author(s) used _____ [NOME DA FERRAMENTA / SERVIÇO] para

_____. [REASON].

The author(s) reviewed and edited the content as necessary and assume full responsibility for the article's content.

Note: The statement above will be published at the end of the article. It does not apply to the use of basic tools, such as those for checking grammar, spelling, and references. If you have nothing to declare, it is not necessary to include a statement; simply check "no."

OPEN SCIENCE COMPLIANCE

Provide information on the manuscript's compliance with Open Science communication practices. Authors are requested to indicate: (a) whether the manuscript is a preprint and, if so, its location; and (b) whether data, program codes, and other materials underlying the manuscript's text are properly cited and referenced.

Preprints

Deposit of the manuscript on a preprint server recognized by the journal.

Is the manuscript a preprint?

Yes. Indicate the name of the Preprint Server: _____

DOI of the Preprint: _____

No

Availability of Research Data and Other Materials

Authors are encouraged to make all content (data, program codes, and other materials) underlying the manuscript's text available either prior to or at the time of publication. Exceptions are permitted in cases involving legal or ethical concerns. The aim is to facilitate the evaluation of the manuscript and, if approved, contribute to the preservation and reuse of content and the reproducibility of research.

Are the contents already available in full and without restrictions, or will they be available at the time of publication?

Yes:

the contents underlying the research text are included in the manuscript.

The contents are already available in a data repository.

Please provide the titles, corresponding URLs, access numbers, or DOIs of the files related to the manuscript's content (use one line for each entry):

[] No:

[] data is available upon request for reviewers. Please justify below.

[] after publication, data will be available upon request for authors. Please justify below.

[] Data cannot be publicly available. Please justify below.

AUTHOR CONTRIBUTIONS

Please specify below the contribution of each co-author to the article, applicable for Original Article, Review Article, Viewpoint, Case Report, and Brief Communication:

I declare that _____ (Author 1) participated in the study, and their specific contribution is described as follows:

_____ conception and design of the research

_____ data collection

_____ data analysis and interpretation

_____ statistical analysis

_____ funding acquisition

_____ manuscript drafting

_____ critical revision of the manuscript for important intellectual content

_____ others. Please specify: _____

I declare that _____ (Author 2) participated in the study, and their specific contribution is described as follows:

_____ conception and design of the research

_____ data collection

_____ data analysis and interpretation

_____ statistical analysis

_____ funding acquisition

_____ manuscript drafting

_____ critical revision of the manuscript for important intellectual content

_____ others. Please specify: _____

I declare that _____ (Author 3) participated in the study, and their specific contribution is described as follows:

conception and design of the research
 data collection
 data analysis and interpretation
 statistical analysis
 funding acquisition
 manuscript drafting
 critical revision of the manuscript for important intellectual content
 others. Please specify: _____

I declare that _____ (Author 4) participated in the study, and their specific contribution is described as follows:

conception and design of the research
 data collection
 data analysis and interpretation
 statistical analysis
 funding acquisition
 manuscript drafting
 critical revision of the manuscript for important intellectual content
 others. Please specify: _____

I declare that _____ (Author 5) participated in the study, and their specific contribution is described as follows:

conception and design of the research
 data collection
 data analysis and interpretation
 statistical analysis
 funding acquisition
 manuscript drafting
 critical revision of the manuscript for important intellectual content
 others. Please specify: _____

I declare that _____ (Author 6) participated in the study, and their specific contribution is described as follows:

conception and design of the research
 data collection
 data analysis and interpretation

statistical analysis
 funding acquisition
 manuscript drafting
 critical revision of the manuscript for important intellectual content
 others. Please specify: _____

I declare that _____ (Author 7) participated in the study, and their specific contribution is described as follows:

conception and design of the research
 data collection
 data analysis and interpretation
 statistical analysis
 funding acquisition
 manuscript drafting
 critical revision of the manuscript for important intellectual content
 others. Please specify: _____

I declare that _____ (Author 8) participated in the study, and their specific contribution is described as follows:

conception and design of the research
 data collection
 data analysis and interpretation
 statistical analysis
 funding acquisition
 manuscript drafting
 critical revision of the manuscript for important intellectual content
 others. Please specify: _____

I declare that _____ (Author 9) participated in the study, and their specific contribution is described as follows:

conception and design of the research
 data collection
 data analysis and interpretation
 statistical analysis
 funding acquisition
 manuscript drafting

_____ critical revision of the manuscript for important intellectual content
_____ others. Please specify: _____

I declare that _____ (Author 10) participated in the study, and their specific contribution is described as follows:

- _____ conception and design of the research
- _____ data collection
- _____ data analysis and interpretation
- _____ statistical analysis
- _____ funding acquisition
- _____ manuscript drafting
- _____ critical revision of the manuscript for important intellectual content
- _____ others. Please specify: _____

If there are more than 10 authors, please provide additional details below:

[] N/A, for articles such as Editorial, Letter to the Editor, Research Letter, and Short Editorial.

I declare that I take full responsibility for the accuracy of the information provided on behalf of all co-authors and the institutions involved.
